

<b>Common Name</b>	<b>Botanical Name</b>
<a href="#">Black eyed Susan [1]</a>	Rudbeckia spp
<a href="#">Blanket Flower [2]</a>	Gaillardia pulchella
<a href="#">Buttonbush [3]</a>	Cephalanthus occidentalis
Chapman's Goldenrod [4]	Solidago odora var. chapmanii
<a href="#">Common Pokeweed [5]</a>	Phytolacca americana
<a href="#">Coral Bean [6]</a>	Erythrina herbacea
<a href="#">Cutleaf Coneflower [7]</a>	Rudbeckia spp
<a href="#">Dotted Horsemint [8]</a>	Monarda Puntata
<a href="#">Dune Sunflower [9]</a>	Helianthus debilis
<a href="#">False Indigo [10]</a>	Amphora fruticosa
<a href="#">Frostweed</a>	Verbesina virginica
<a href="#">Indian Woodoats</a>	Chasmanthium latifolium
<a href="#">Ironweed, Giant</a>	Vermonia gigantea
<a href="#">Ironweed, Tall</a>	Venonia angustifolia
<a href="#">Liartris</a>	mixed
<a href="#">Milkweed, Aquatic, white swamp</a>	Asclepius perennis
<a href="#">Milkweed, Swamp, pink swamp</a>	Asclepius incarnata
<a href="#">Necklace Pod [11]</a>	Sophora tomentosa
<a href="#">Pineland Hibiscus [12]</a>	Hibiscus aculeatus
<a href="#">Partridge Pea</a>	Chamaecrista fasciculata
<a href="#">Scarlet Hibiscus</a>	Hibiscus coccineus
<a href="#">Scorpiontail</a>	Heliotropium angiospermum
<a href="#">Stokes Aster [13]</a>	Stokesia laevis
<a href="#">Tickseed</a>	Coreopsis lanceolata
<a href="#">Tropical Sage, Scarlet sage [14]</a>	Salvia coccinea
<a href="#">Vanilla Plant</a>	Carphephorus odoratissimus
<a href="#">Varnishleaf</a>	Dodonaea viscosa
<a href="#">White Beard Tongue</a>	Penstemon multiflorus
<a href="#">Wild Petunia</a>	Ruellia Caroliniensis
<a href="#">Zephyr Lily</a>	Zephyranthes atamasca

## Seed List

[1] Annual showy yellow flower with brown center. Winter dormant. Light - full sun - part shade. Soil - sand, clay, loam. Not salt tolerant. Moisture - moderate.

[2] Annual with height of .75-1.5' tall. Showy yellow, orange and red flowers. Winter dormant, full sun. Moisture- moderate to very dry. Highly salt tolerant. Soil - sand, clay or loam.

[3] Long lived perennial shrub. Height 5-20' Width 4-8'. Showy fragrant, white yellow flowers in a little ball shape. Prefers sun - part shade. Moisture very damp. Grows in wetlands or edges. Soil - sand, clay, muck organic matter. Poisonous if consumed by livestock.

[4] Long Lived perennial, Ht 3-5". Showy fragrant yellow flowers. Plant in full sun. Moisture - dry to very dry. Soil - sandy. Highly salt tolerant. Winter dormant

[5] Short lived perennial, showy white flowers yield black fruits favored by birds. Ht. 6-10' W 5-8'. Plant in full sun. Moisture - moderate to dry. Soil - Sand or loam. Roots and fruits are poisonous but not to birds.

[6] Long lived perennial shrub. Red flower spikes in spring. Yield brown seed pods with poisonous red seeds. Ht 3-20', W 2-10'. Sun - pt shade. Moisture - moderate to very dry. Scarify seeds with abrasive sand paper, or soak in water for germination. Or nick the seed with a knife.

[7] Short lived perennial. Showy yellow flowers. Ht. 3-12' W 1-2'. Grows in sun to pt shade. Moderate moisture, Soil - Sandy - loamy. Moderately salt tolerant. Winter dormant.

[8] Annual, readily reseeds. Showy pink flower. Soil - dry to slightly moist but well drained. Plant in full sun to pt shade. Grows 1-4' tall.

[9] Short lived perennial shrub, Showy yellow flowers. Ht 1-2.5' W 2-8'. Plant in full sun. Soil - Sandy. Moisture - dry. Good ground cover for sandy environments. Self seeds easily. Deciduous, Salt tolerant.

[10] Perennial shrub with showy maroon flowers. Ht. 6' Moisture - dry. Plant in sun to part shade. Deciduous.

[11] Long lived perennial shrub with showy yellow flowers yielding brown seed pods. Evergreen, long bloom period. Tolerates poor soil Extremely salt tolerant. Prefers full sun. Moisture- Moderate to dry. Scarify with boiling water bath for germination.

[12] Pineland hibiscus needs scarification. Nick with knife or sand paper then soak seed in water overnight. Seeds should be planted 2x as deep as they are big. Seed does not store well.

[13] Use a clean dry tray. Fill with commercial seed starter. Don not push down. Mist soil with spray bottle. Spread seed on top of damp soil. Barely cover with soil as seed needs light to germinate. Mist again. Cover tray with plastic. Place in warm 65-75 degree area. Keep moist. Seeds germinate in 2-3 weeks. Remove plastic cover when seedlings touch plastic.

[14] Many bright red tubular blooms per stalk. Moisture - Dry - moist. Light - sun to part shade. Soil - loamy. Ht. 1-3'. Readily reseeds.
